CHARLES COUNTY PRETREATMENT PROGRAM  
WASTEWATER DISCHARGE PERMIT APPLICATION

*Please answer all questions. Indicate "N/A" if the question does not apply to your business. If you have questions concerning this application, please call (301) 609-5632 Monday thru Friday 8:00 a.m. to 2:30 p.m.*

WHO MUST APPLY?

- A Wastewater Discharge Permit Application is required for all businesses that discharge industrial (non-residential) waste that requires pretreatment before discharge to the County sewers.

GREASE INTERCEPTORS

- Any businesses that may potentially discharge fats, oils and greases (FOG) need to pretreat their discharge with a grease interceptor (G/I). This includes restaurants, food prep areas in churches, shops and schools, and food processing industries. ***The 1998 Water and Sewer Ordinance stipulates that a minimum 2,000 gallon grease interceptor is required for all food handling businesses.*** This includes everything from a simple hot dog roller to full service restaurants. No exceptions. If you are in doubt about whether you are required to have an interceptor, please call the pretreatment technician at (301) 609-5632.

BOX 2 INFORMATION

- Please indicate whether your business is regulated under federal law by 40 CFR parts 401 thru 471. These are the pretreatment regulations in the federal law. Please note that these regulations are self-implementing. This means that it is your responsibility to notify the County if you are subject to any of these regulations. Failure to notify the County is a violation of both federal and local laws and may subject you to legal action. You may find the pretreatment regulations at <http://www.epa.gov/docs/epacfr40/chapt-I.info/subch-N.htm>.
- List your NAICS (North American Industrial Code System) code. NAICS codes replace SIC (Standard Industrial Code) codes. If you do not know your NAICS code, you may find it at <http://www.census.gov/epcd/www/naicstab.htm>.
- Please indicate the estimated water usage in Gallons Per Day (GPD). Existing locations may want to refer to their water bills if billed separately.
- Describe the nature of the wastewater discharge. For example: dishwashing, equipment washing, vehicle washing, product manufacturing, photo processing, etc.
- Check any of the listed equipment or systems you have or will have on the premises. Note that bulk chemical storage will require a separate Spill Control Plan.

### BOX 3 INFORMATION

- Indicate the type of business you will be conducting. If you check "OTHER", please write the type of business in the space provided.
- Briefly describe your business function for the business in question 1. For example: doctor's office with x-ray machine, fast food restaurant, drug store with photo processing, automotive repair shop, printing shop, etc.

- List your normal business hours.
- For restaurants, please estimate the number of meals you will serve during peak hour and the number of meals served daily. Please indicate the maximum seating capacity for restaurants.
- Indicate whether an existing grease interceptor is on the premises and if so, its size in gallons. Please note that a 2,000 gallon capacity interceptor is the minimum requirement. Existing interceptors which are less than a 2,000 gallon capacity will have to be upgraded or replaced to meet the minimum requirement.
- If the name of the previous business at this location is known, please indicate that name.
